RE: Deep Creek Distribution System

Dear Mr. Luck:

In response to your letter dated November 29, 1964, I have the following comments.

- 1) The Deep Creek Distribution System was set up in response to a court order signed by Judge Allen B. Sorenson, for the District Court of Uintah County, dated July 5, 1963.
- 2) Since the distribution system is technically under the jurisdiction of the court, the State Engineer does not have the authority to suspend the operation of the distribution system during wet years without an order from the district court.
- 3) The 1964 distribution system meeting was held on March 20, 1964, at which time Richard Perry was not in attendance. A motion was made to retain Mr. Perry as water commissioner if he would accept the job at the 1963 salary. Mr. Perry subsequently told me that he would accept the job and he has acted as commissioner for the 1964 irrigation season.

I agree that we should move the annual meeting up so that we can resolve the problems, which are occurring. I would suggest we hold the meeting in the early part of February and I will attempt to schedule our meeting to coincide with the Mosby meeting, if you will tell me what date you prefer.

In regards to the delinquent assessment, my research indicates Mr. Perry was properly appointed and the assessment should be paid immediately.

If you have any questions or comments, feel free to contact me.

Sincerely yours,

Richard B. Hall, P. E.
Distribution Engineer

cc: Mr. Richard Perry, Commissioner
Mr. Robert F. Guy, Area Engineer, Vernal
Mr. Richard Fenton, Accountant, Salt Lake City
